

Nice or Nasty?

A place value game for 2 players

**LAMINATE FOR A
REUSABLE GAME!**

Nice version

1. Choose the aim of the game: To get the closest to a target number, the largest number or the smallest number.
2. First player rolls the die.
3. First player then chooses where to place the rolled number on their grid.
4. Second player rolls the die and chooses where to place their number on their grid.
5. Play continues until both players have filled their grid.
6. See who the winner is!

Nasty version

Play the game using the same rules as the 'nice' version, but with one twist. Once a player has rolled the die, they may choose any place on **either** their own grid **or their partner's grid!**

Let the battle commence!
