

20.4.20 LO To be able to write instructions to explain how to plant seeds.

Look at the pictures and write instructions to explain how to plant a seed. You could either print out this sheet or write your instructions in your workbook.

- Remember to use bossy verbs eg make, put, water
- Try to use words like - first, next, when
- Use adjectives and adverbs to add detail to your instructions eg small hole, carefully make.

Useful words

compost

hole

seed

water

I haven't got a photo but don't forget, the seeds need covering with compost once they have been planted.

Think about where we would need to put our trays of seeds once they were planted and write that as your last instruction.
