Maths tasks for the day

Hi Year 2

Maths this half term our maths lessons are going to be split into 2 parts.

Part 1 - Revision of all our number work - Just like our maths meetings in school

Part 2 - White Rose Daily lessons

Part 1

- Number bonds to 10 and 20

Play the game to practise -first choose the target number to be 10 and then 20. https://www.mathplayground.com/number_bonds_20.html

- Adding two 2-digit numbers (carrying on from where we left off before Easter).

Part 2 Fractions - you were all becoming experts.

Remember when you split a shape into quarters, there are 4 equal parts. Today we are not finding $\frac{1}{4}$, we are finding 3 quarters.

The clip talks you through what to do and there is a worksheet to complete. You can either print the worksheet out or write the answers in your exercise book.
